Question 3 of 3

When applying Soil Health Classification, what should be the primary focus?

- (●) Understanding Classification models
- ( ) Ignoring improved techniques
- ( ) Avoiding technology
- ( ) Using outdated methods

✅ **Correct!**

Focusing on Classification models ensures that the implementation of Soil Health Classification yields the best results.

Question 3 of 3

When applying PlantVillage Dataset Overview, what should be the primary focus?

- Understanding Loading data
- Ignoring improved techniques
- Avoiding technology
- Using outdated methods

❌ Incorrect

Correct: **Understanding Loading data**

Focusing on Loading data ensures that the implementation of PlantVillage Dataset Overview yields the best results.

Question 3 of 3

Fine-tuning means:

- ○ Starting from scratch
- ◉ Adjusting pre-trained weights
- ○ Deleting model
- ○ Only testing

✅ **Correct!**

Fine-tuning retrains later layers on new data.
